Our Choice: Democracy or
Corporate Rule A handful
of corporations and

financial institutions command an ever-greater concentration of economic and political power in an assault against markets, democracy, and life. It's a "suicide economy," says David Korten, that destroys the very foundations of its own existence. The bestselling 1995 edition of *When Corporations Rule the World* helped launch a global resistance against corporate domination. In this twentieth-anniversary edition, Korten shares insights from his personal experience as a

participant in the growing movement for a New Economy. A new introduction documents the further concentration of wealth and corporate power since 1995 and explores why our institutions resolutely resist even modest reform. A new conclusion chapter outlines high-leverage opportunities for breakthrough change. *52 Mondays* Liberationist Argues that a fundamental change in the world's belief structure--the acceptance of consciousness as a

causal reality--is changing society

The Neoliberal Ethic and the Spirit of Global Capital

Simon and Schuster

A call for a paradigm shift in human thinking in recognition of the interconnectedness of all things--a new mind for a new world • Explains how the instability of our current time is part of a larger cycle of human evolution that will soon turn toward renewal and regeneration • Reveals how to participate in the

process of conscious evolution to maintain resilience during these transitional times •

Examines new findings in quantum physics and quantum biology on the interconnectivity of all life and how to utilize this for conscious evolution For centuries, indigenous wisdom traditions have talked of an epochal shift on the horizon, of a spiritual renaissance for the earth and her living family. Now the timelines are converging and the potential for an energetic “upgrade” for humanity is

here, but first we must survive and evolve through the current period of transition.

Explaining that evolution is not a gradual process but more like a “shock to the system”--radical waves of transformation after a period of dormancy--author Kingsley Dennis reveals that we are currently undergoing an evolutionary leap and shows not only how to survive but also thrive in this period of global upheaval and change. Examining the nature of

evolutionary cycles, he explains that the instability we are now experiencing--climate change, economic meltdowns, and increasing political polarization--is the convergence of complex systems that have reached a critical state. What we need in order to push through to the coming spiritual renaissance is a paradigm shift in human thinking and perception, a conscious evolution in recognition of the interconnectedness of all

things--a new mind for a new world. Examining new findings in quantum physics and quantum biology on the interconnectivity of all life as well as opportunities for us to reawaken our slumbering souls, this book offers a glimpse of the new global society to come, a renewed humanity for the 21st century, and how each of us can best participate during the process of planetary transformation. *Choose This Day* Createspace Independent Pub

We live in a world unimaginable only decades ago: a domain of backlit screens, instant information, and vibrant experiences that can outcompete dreary reality. Our brave new technologies offer incredible opportunities for work and play. But at what price? Now renowned neuroscientist Susan Greenfield—known in the United Kingdom for challenging entrenched conventional

views—brings together a range of scientific studies, news events, and cultural criticism to create an incisive snapshot of “the global now.” Disputing the assumption that our technologies are harmless tools, Greenfield explores whether incessant exposure to social media sites, search engines, and videogames is capable of rewiring our brains, and whether the minds of people born before and after the advent of the Internet differ. Stressing the impact on Digital Natives—those who’ve

never known a world without the Internet—Greenfield exposes how neuronal networking may be affected by unprecedented bombardments of audiovisual stimuli, how gaming can shape a chemical landscape in the brain similar to that in gambling addicts, how surfing the Net risks placing a premium on information rather than on deep knowledge and understanding, and how excessive use of social networking sites limits the

maturation of empathy and identity. But Mind Change also delves into the potential benefits of our digital lifestyle. Sifting through the cocktail of not only threat but opportunity these technologies afford, Greenfield explores how gaming enhances vision and motor control, how touch tablets aid students with developmental disabilities, and how political “clicktivism” foments positive change. In a world where adults spend ten hours a day online, and where tablets

are the common means by which children learn and play, Mind Change reveals as never before the complex physiological, social, and cultural ramifications of living in the digital age. A book that will be to the Internet what An Inconvenient Truth was to global warming, Mind Change is provocative, alarming, and a call to action to ensure a future in which technology fosters—not frustrates—deep thinking, creativity, and true fulfillment. Praise for Mind Change “Greenfield’s

application of the mismatch between human and machine to the brain introduces an important variation on this pervasive view of technology. . . . She has a rare talent for explaining science in accessible prose.”—The Washington Post “Greenfield’s focus is on bringing to light the implications of Internet-induced ‘mind change’—as comparably multifaceted as the issue of climate change, she argues, and just as important.”—Chicago Tribune “Mind Change is

exceedingly well organized and hits the right balance between academic and provocative.”—Booklist “[A] challenging, stimulating perspective from an informed neuroscientist on a complex, fast-moving, hugely consequential field.”—Kirkus Reviews “[Greenfield] is not just an engaging communicator but a thoughtful, responsible scientist, and the arguments she makes are well-supported and persuasive.”—Mail on Sunday “Greenfield’s

admirable goal to prove an empirical basis for discussion is . . . an important one.”—Financial Times “An important presentation of an uncomfortable minority position.”—Jaron Lanier, *Nature*

 Life, liberty, and the pursuit of happiness are prescribed ideals in America of 2050. The Moral Authority, the nation's newest branch of

government, has virtually eliminated crime, poverty, and most social ills, but it also rules the land with a tyrannical fist, championing ignorance and brandishing fear. Mark Bryan is a gay man whose existence brands him an outlaw; Isaac Montoya is a charming stranger, who entices Mark to defy moral law; and Samuel Pleasant runs the Moral Authority and plans to punish moral offenders and a rebellious uprising-no matter the cost. Will liberty and justice return for all?

New Consciousness for a New World Global Mind ChangeThe New Age Revolution in the Way We Think
As Ruben Wells kneels with a gun pointed at his head all he can do is reflect on the life he spoiled. What has led him here? Was it his willingness to always try to do the right thing that has him staring at the barrel of a gun? Or was that he was too much of a people pleaser having a hard time saying no that has led to him begging for his life? Every thing

begins and ends with a choice. The moment a choice is made it only takes a second for a life to change. Ruben made a choice to initiate a relationship with the alluring Bianca Jones. She makes heads turn and every man's dream. She is beautiful as a gazelle, but as dangerous as a lioness, as she's unavailable due to being unhappily married with children. Being married doesn't keep her from wanting to pursue Ruben as well as being pursued by him. Getting involved with

Bianca changes Ruben's life in ways he never could have imagined. Choices are a gift constantly given to everyone. The choices made lead to different paths. We all have to choose this day what we're going to do with our own lives not knowing what the end result will be. What kind of impact will Ruben's choices have on his life?

“Pollan keeps you turning the pages . . . clear-eyed and assured.” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and

scientific revolution taking place around psychedelic drugs—and the spellbinding story of his own life-changing psychedelic experiences
When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how

these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to

separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an

exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives. When we're going through challenging times, we

tend to think we're alone. In the middle of the bad times, it's difficult to see how life could ever be even just okay again, never-mind good. The purpose of this book is to provide encouragement and inspiration for those who are going through challenges from which they can currently see no relief. Reading stories of ordinary people overcoming extraordinary challenges using a technique you can use to achieve the same results is one of the most empowering gifts you can

give to yourself. "It's 2 a.m. I am in Hawaii. And I'm dying. The pain comes in my body and the voice in my mind confirms it. This is real. Cancer is real. As I look down the barrel of my own emotional gun, my mind flashes back to conversations with another practitioner when I recall saying to her of her Fibromyalgia recovery account - "It's alright for you - You've got a story! I don't have one! " Well, be careful what you ask for - because you just might get it. I'll rephrase that. Be careful what you ask

for -you will definitely get it. I definitely had a story now. The question was would I live to tell it?" Foreword by Robert G. Smith (Founder of FasterEFT) *It's Not It CreateSpace* An "elegantly argued and exuberantly narrated" (The New York Times Book Review) look at the building of social movements--from the 1600s to the present--and how current technology is undermining them "A bravura work of scholarship and reporting, featuring amazing

individuals and dramatic events from seventeenth-century France to Rome, Moscow, Cairo, and contemporary Minneapolis."--Louis Menand, author of *The Free World* We tend to think of revolutions as loud: frustrations and demands shouted in the streets. But the ideas fueling them have traditionally been conceived in much quieter spaces, in the small, secluded corners where a vanguard can whisper among themselves, imagine alternate

realities, and deliberate about how to achieve their goals. This extraordinary book is a search for those spaces, over centuries and across continents, and a warning that--in a world dominated by social media--they might soon go extinct. Gal Beckerman, an editor at The New York Times Book Review, takes us back to the seventeenth century, to the correspondence that jump-started the scientific revolution, and then forward through time to examine engines of

social change: the petitions that secured the right to vote in 1830s Britain, the zines that gave voice to women's rage in the early 1990s, and even the messaging apps used by epidemiologists fighting the pandemic in the shadow of an inept administration. In each case, Beckerman shows that our most defining social movements--from decolonization to feminism--were formed in quiet, closed networks that allowed a small group to incubate their ideas

before broadcasting them widely. But Facebook and Twitter are replacing these productive, private spaces, to the detriment of activists around the world. Why did the Arab Spring fall apart? Why did Occupy Wall Street never gain traction? Has Black Lives Matter lived up to its full potential? Beckerman reveals what this new social media ecosystem lacks--everything from patience to focus--and offers a recipe for growing radical ideas again. Lyrical and profound, *The Quiet Before* looks to the past to

help us imagine a different future.
