Teacher education is at the base of all educational systems. To make it effective, we need an education system that equips the teacher trainees with the necessary skills to perform their tasks effectively in the classroom. This book discusses how to train teachers, improve teacher education programmes, and impart quality education. The book, now in its second edition, emphasizes development of skills in teachers, keeping in mind the rapid use of technology and changes in education policies, procedures and provisions. Each chapter has been carefully revised as per the latest NCTE norms and standards recommended by Justice Verma Commission. This well-organized book is primarily intended for the postgraduate students of Education—M.A. Education and M.Ed. Besides, teacher trainees enrolled in B.Ed. and Diploma in teaching programmes, teacher educators, distance education school-based administrators and policymakers will also find the book useful. **KEY FEATURES** • Deals with necessary pedagogical skills and competencies to make the teachers professionally competent. • Provides a comparative study of teacher education of a number of countries to put things in the right perspective. • Makes extensive use of flowcharts and diagrams to enable the readers to understand the topics discussed with great ease. **TARGET AUDIENCE** • M.A. (Education) • M.Ed. • Teacher trainees

TEACHER EDUCATION, SECOND EDITION Peterson's

The purpose of this study was to determine the perceptions of chief academic officers (CAOs) and chief distance education officers (CDOs) regarding faculty satisfaction in areas of released time for training and course development, workload, overall support of distance education, and extra compensation. One-hundred-sixteen surveys were sent out by e-mail to all 58 community colleges in North Carolina. The data for this study came from the returned surveys. The combined return rate of surveys was 78%. The SAS Institute program procedures were used for the analysis of the data. An alpha level of .05 was used for all statistical analyses. Results of this study showed differences between the CAOs and CDOs regarding faculty satisfaction on key issues. One reason for this could be more frequent contact of faculty with CDOs than with the CAOs. Recommendations for further research include: 1. This study should be replicated in 2 to 3 years to ascertain what changes have occurred in North Carolina community colleges; 2. Similar comparative studies should be made regarding community colleges in other states; 3. Additional studies should be conducted in North Carolina to gather comments and concerns directly from faculty members. The following recommendations are made to improve distance education in North Carolina: 1. Adequate technology funding for distance education programs in North Carolina community colleges needs to be acquired; 2. A

state formula should be developed to enable the sharing of FTE for community colleges in North Carolina that provide joint distance education programs; 3. Long-range plans for supporting and training faculty members and funding distance education programs should be developed in North Carolina community colleges; 4. Community colleges without written distance education policies should develop them; 5. Community college administrators should become better informed about the needs of distance education faculty members and programs; and 6. A state wide task-force needs to be developed to study the needs of distance education faculty members and programs in North Carolina.

Tamil Nadu Economy DIANE Publishing

Web-Based Education in the Human Services reflects the vitality and diversity of Web-based courses currently delivered within human services. Unlike previous texts that have combined technologies such as Interactive Television (ITV) and two-way audio where Web involvement was minimal, this unique book focuses on Web-based models, tools, and techniques used in courses where the majority of the content is delivered online. The book's contributors emphasize the social aspects of learning, examining topical areas not usually associated with Web-based education as they remind us of the need to move beyond the similarities between WBE and face-to-face (FTF) approaches.

Web-based Education in the Human Services Peterson's

The Quarterly Review of Distance Education is a rigorously refereed journal publishing articles, research briefs, reviews, and editorials dealing with the theories, research, and practices of distance education. The Quarterly Review publishes articles that utilize various methodologies that permit generalizable results which help guide the practice of the field of distance education in the public and private sectors. The Quarterly Review publishes full-length manuscripts as well as research briefs, editorials, reviews of programs and scholarly works, and columns. The Quarterly Review defines distance education as institutionally-based formal education in which the learning group is separated and interactive technologies are used to unite the learning group.

This indispensable resource is available only from LexisNexis.

TNOU B.Ed. Entrance Examination (English) IAP

This volume takes a comprehensive and broad look at e-text programs across a wide spectrum of programs, institutions, and policies in three parts. The first part showcases several policy papers to contextualize the discussion and highlight the reasons for IAE programs' structure and the obstacles they face for implementation. The second part is an in-depth exploration of various case studies that provide a detailed description of IAE programs, including information about program elements, program structure, program size, and insights into how programs are operationalized, and their shortcomings and benefits to

students and stakeholders. The final part is a selection of research papers that offer evidence-based support for the adoption of IAE programs in terms of student success, access, engagement, costs, and a variety of other student and institutional outcomes. There are approximately 300 institutions of higher education that currently have some form of Inclusive Access or Open Educational Resources E-text (IAE) program in the United States, but there is little scholarship that engages on the topic of assessing these programs' effect on student success. The results of the research studies included in this volume will inform faculty, administrators, and policy-makers who seek to support the development, adoption, and implementation of IAE programs based on their potential positive effects on student success and other outcomes.

Features At-A-Glance: • Completely annotated • TCA Quick Reference Guide • Summaries of important education-related legislation • Updated annually
A Survey of the States A Survey of Distance Education Programs Offered by Post-Secondary Schools Within a 150 Mile Radius of Chattanooga, Tennessee
Long distance education has been a part of instructional delivery for more than one hundred years. Beginning as correspondence study accompanying the establishment of national postal systems, distance education has undergone dramatic change fueled by the rapid and recent explosion of technology. This exponential growth in technology has provided educators with new delivery methods for instruction, allowing post-secondary schools to reach greater numbers of students through the enrollment of individuals who would ordinarily be unable to attend traditional on-site classes. The purpose of this research was to obtain data on the numbers of courses and programs and delivery methods for distance education within a 150 mile radius of Chattanooga, TN. Data were obtained from 99 of the 104 post-secondary institutions within the survey area. Data collection was accomplished using surveys completed through telephone interviews, email inquiries, and information available at web site hosted by institutions in the

target population. Initial information about the post-secondary institutions in the survey area was first obtained through state education department sources or Internet sources. This information included the type of school (two-year private colleges, four-year private colleges and universities, two-year community and technical colleges, two-year public senior colleges and universities, or four-year public colleges and universities), address, telephone number, email address, etc. Next the post-secondary institutions were contacted via email or telephone and the survey was administered. The results of this study can be used to evaluate the long distance learning programs that are currently offered by post-secondary schools within a 150-mile radius of Chattanooga, Tennessee. Distance education is relatively young in the history of education and has experienced rapid growth during the past several decades, particularly with regard to the online delivery of instruction. Distance education provides educational opportunities to individuals that are separated by distance and/or time, allowing instruction in remote locations. Appended are: (1) Long Distance Learning Survey; (2) Numbers of Post-Secondary Institutions by Data Collection Method; and (3) Types of Degree Programs Offered through Distance Education in the Survey Area. (Contains 6 tables and 6 figures.).
Resources in Education TNOU B.Ed.
Entrance Examination (English)
Profiles more than 3,200 degree programs for traditional students, RNs, advanced-practice nurses, and nurse Ph.D.s, and includes research-facility descriptions, tuition, financial aid programs, and entrance requirements.
Professionalism in Teacher Education Springer Nature
