Questions of migration and citizenship are at the heart of global political debate with Brexit and

the election of Donald Trump having ripple effects around the world. Providing new insights into the politics of migration and citizenship in the UK and the US, this book challenges the increasingly prevalent view of migration and migrants as threats and of formal citizenship as a necessary marker of belonging. Instead the authors offer an analysis of migration and citizenship in practice, as a counterpoint to simplistic discourses. The book uses cutting-edge

academic work on migration and citizenship to address three themes central to current debates – borders and walls, mobility and travel, and belonging. Through this analysis a clearer picture of the roots of these politics emerges as well as of the consequences for mobility, political participation and belonging in the 21st century.

The book is a response to the dominant discourse of South Africa as

unwelcoming to African immigrants.

Acknowledging the reality of xenophobia against African migrants in South Africa, it explores the positive spaces of interactions between South Africans and African migrants that do not necessarily result in tension. Hence, the book is about conviviality, cohabitation, interdependency and the production of a multicultural rainbow nation. South Africa, its constitution and representation as a

multicultural society is the perfect context to experiment with the ideas in the book. Part of the objectives is therefore to demonstrate, as contained in the title, the ambivalence of this relationship which the popular discourse of xenophobia has silenced.

This innovative book looks at the topic of migration through the prism of law and literature. The author uses a rich mix of novels, short stories, literary realism, human rights and comparative literature to

explore the experiences of African migrants and asylum seekers. The book is divided into two. Part one is conceptual and focuses on art activism and the myriad ways in which people have sought to 'write justice.' Using Mazrui's diasporas of slavery and colonialism, it then considers histories of migration across the centuries before honing in on the recent anti-migration policies of western states. Achiume is used to show how these histories of imposition and exploitation create a bond

which bestows on Africans a "status as co-sovereigns of the First World through citizenship." The many fictional examples of the schemes used to gain entry are set against the formal legal processes. Attention is paid to life post-arrival which for asylum seekers may include periods in detention. The impact of the increased hostility of receiving states is examined in light of their human rights obligations. Consideration is paid to how Africans navigate their post-migration lives

which includes reconciling themselves to status fracture-taking on jobs for which they are over-qualified, while simultaneously dealing with the resentment borne of status threat on the part of the citizenry. Part two moves from the general to consider the intersections of gender and status focusing on women, LGBTI individuals and children. Focusing on their human rights and the fictional literature, chapter four looks at women who have been trafficked as well as

domestic workers and hotel maids while chapter five is on LGBTI people whose legal and literary stories are only now being told. The final substantive chapter considers the experiences of children who may arrive as unaccompanied minors. Using a mixture of poetry and first person accounts, the chapter examines the post-arrival lives of children, some of whom may be citizens but who are continually made to feel like outsiders. The conclusion follows, starting with two stories

about walls by Hadero and Lanchester which are used to illustrate the themes discussed in the book. Few African lawyers write about literature and few books and articles in Western law and literature look at books by or about Africans, so a book that engages with both is long overdue. This book provides fascinating reading for academics, students of law, literature, gender and migration studies, and indeed the general public.

Uncertain citizenship

Edward Elgar Publishing Millennials, Baby Boomers, Gen Z—we like to define people by when they were born, but an acclaimed social researcher explains why we shouldn't. Boomers are narcissists. Millennials are spoiled. Gen Zers are lazy. We assume people born around the same time have basically the same values. It makes for good headlines, but is it true? Bobby Duffy has spent years studying generational distinctions. In *The Generation Myth*, he argues that our

generational identities are not fixed but fluid, reforming throughout our lives. Based on an analysis of what over three million people really think about homeownership, sex, well-being, and more, Duffy offers a new model for understanding how generations form, how they shape societies, and why generational differences aren't as sharp as we think. *The Generation Myth* is a vital rejoinder to alarmist worries about generational warfare and

social decline. The kids are all right, it turns out. Their parents are too. *Men, Masculinities and Honour-Based Abuse* Edward Elgar Publishing
This book is a study of the UK-based Ahmadiyya Muslim community in the context of the twentieth-century South Asian diaspora. Originating in late nineteenth-century Punjab, the Ahmadis are today a vibrant international religious movement; they are also a group that has been declared heretic by other Muslims and one that

continues to face persecution in Pakistan, the country the Ahmadis made their home after the partition of India in 1947. Structured as a series of case studies, the book focuses on the ways in which the Ahmadis balance the demands of faith, community and modern life in the diaspora. Following an overview of the history and beliefs of the Ahmadis, the chapters examine in turn the use of ceremonial occasions to consolidate a diverse international community;

the paradoxical survival of the enchantments of dreams and charisma within the structures of an institutional bureaucracy; asylum claims and the ways in which the plight of asylum seekers has been strategically deployed to position the Ahmadis on the UK political stage; and how the planning and building of mosques serves to establish a home within the diaspora. Based on fieldwork conducted over several years in a range of formal and informal contexts, this timely book

will be of interest to an interdisciplinary audience from social and cultural anthropology, South Asian studies, the study of Islam and of Muslims in Europe, refugee, asylum and diaspora studies, as well as more generally religious studies and history.

Theresa May, *The Hostile Environment and Public Pedagogies of Hate and Threat* analyses Theresa

May's involvement in the creation and promotion of public pedagogies of hate and threat around the issue of immigration, which are used to instil fear, stress and anxiety among large sections of the population. This book uses public pedagogy as a theoretical lens and examines the economic and political backdrop to the hostile environment, before moving on to a consideration of its creation and consolidation by Theresa May as Home Secretary and later as Prime Minister. The

effects of the hostile environment on health and education are addressed, as well as its specific impacts on asylum seekers and women. The book also interrogates the Windrush scandal and divided families, as well as the author and his family's personal experiences of the hostile environment. It concludes by considering the escalation of racism in general, the crisis in neoliberalism, and the case for a socialist future without borders. This topical book will appeal to

doctoral, postgraduate and advanced undergraduate students in the fields of education studies, pedagogy and sociology as well as those interested in UK politics.

 Uncertainty is central to the governance of

citizenship, but in ways that erase, even deny, this uncertainty. This book investigates uncertain citizenship from the unique vantage point of 'citizenisation': twenty-first-century integration and naturalisation measures that make and unmake citizens and migrants, while indefinitely holding many applicants for citizenship in what Fortier calls the 'waiting room of citizenship'. Fortier's distinctive theory of citizenisation foregrounds how the full achievement

of citizenship is a promise that is always deferred: if migrants and citizens are continuously citizenised, so too are they migratised. Citizenisation and migratisation are intimately linked within the structures of racial governmentality that enables the citizenship of racially minoritised citizens to be questioned and that casts them as perpetual migrants. Drawing on multi-sited fieldwork with migrants applying for citizenship or settlement and with intermediaries of the state

tasked with implementing citizenisation measures and policies, Fortier brings life to the waiting room of citizenship, giving rich empirical backing to her original theoretical claims. Scrutinising life in the waiting room enables Fortier to analyse how citizenship takes place, takes time and takes hold in ways that conform, exceed, and confound frames of reference laid out in both citizenisation policies and taken-for-granted understandings of 'the citizen' and 'the migrant'. Uncertain

Citizenship's nuanced account of the social and institutional function of citizenisation and migratisation offers its readers a grasp of the array of racial inequalities that citizenisation produces and reproduces, while providing theoretical and empirical tools to address these inequalities. [The London Diplomatic List](#) NYU Press From the Master and Servant legislation to the Factories Acts of the 19th century, the criminal law has always had a vital yet

normatively complex role in the regulation of work relations. Even in its earliest forms, it operated both as a tool to repress collective organizations and enforce labour discipline, while policing the worst excesses of industrial capitalism. Recently, governments have begun to rediscover criminal law as a regulatory tool in a diverse set of areas related to labour law: 'modern slavery', penalizing irregular migrants, licensing regimes for labour market

intermediaries, wage theft, supporting the enforcement of general labour standards, new forms of hybrid preventive orders, harassment at work, and industrial protest. This volume explores the political and regulatory dimensions of the new 'criminality at work' from a wide range of disciplinary perspectives, including labour law, immigration law, and health and safety regulations. The volume provides an overview of the regulatory terrain of 'criminality at work',

exploring whether these different regulatory interventions represent politically legitimate uses of the criminal law. The book also examines whether these recent interventions constitute a new pattern of criminalization that operates in preventive mode and is based upon character and risk-based forms of culpability. The volume concludes by reflecting upon the general themes of 'criminality at work' comparatively, from Australian, Canadian, and

US perspectives. Criminality at Work is a timely, rich and ambitious piece of scholarship that examines the many intersections between criminal law and work relations from a historical and contemporary vantage-point.

Controlling national borders has once again become a key concern of contemporary states and a highly contentious issue in social and political life. But controlling borders is about much more than patrolling territorial boundaries at the edges of states: it now comprises a multitude of practices that take place at different levels, some at the edges of states and some in the local contexts of everyday life – in

workplaces, in hospitals, in schools - which, taken together, construct, reproduce and contest borders and the rights and obligations associated with belonging to a nation-state. This book is a systematic exploration of the practices and processes that now define state bordering and the role it plays in national and global governance. Based on original research, it goes well beyond traditional approaches to the study of migration and racism, showing how these

processes affect all members of society, not just the marginalized others. The uncertainties arising from these processes mean that more and more people find themselves living in grey zones, excluded from any form of protection and often denied basic human rights.

This book provides the first sustained empirical evidence on the relationships between

marriage migration and processes of integration, focusing on two of the largest British ethnic minority groups involved in these kinds of transnational marriages - Pakistani Muslims and Indian Sikhs. In Britain, and across Europe, concern has been increasingly expressed over the implications of marriage-related migration for integration. Children and grandchildren of former immigrants marrying partners from their ancestral 'homelands' is

often presented as problematic in forming a 'first generation in every generation,' and inhibiting processes of individual and group integration, impeding socio-economic participation and cultural change. As a result, immigration restrictions have been justified on the grounds of promoting integration, despite limited evidence. *Marriage Migration and Integration* provides much needed new grounding for both academic and policy debates. This book draws on both quantitative and

qualitative data to compare transnational 'homeland' marriages with intra-ethnic marriages within the UK. Using a distinctive holistic model of integration, the authors examine processes in multiple interacting domains, such as employment, education, social networks, extended family living, gender relations and belonging. It will be of use to students and scholars across sociology, social anthropology, and social policy with a focus on migration, integration,

family studies, gender, and ethnic studies, as well as policy-makers and service providers in the UK and across Europe. *Philosophy of Love in the Past, Present, and Future* Taylor & Francis

Offers a critique of the economic model of immigration Most understandings of migration to the US focus on two primary factors.

Either there was trouble in the home country, such as political unrest or famine, that pushed people out, or there was a general yearning for "a better life" or "more opportunity," often conceptualized as the American Dream. Although many contemporary migrants in the United States have been driven by economic interests, the processes of immigration and integration are shaped also by the intersection of a range of noneconomic factors in both sending and receiving countries.

The contributors to *Beyond Economic Migration* offer a nuanced look at a range of issues affecting motives to migrate and outcomes of integration, including US immigration policy and the visa system, labor market incorporation, employment precarity, identity and belonging, and transnationalism relating to female migrants, student migrants, and temporary foreign workers. *Beyond Economic Migration* argues that, for the dream of fair and equitable

migration to be realized, analyses of cross-border movements, resettlement, and integration must pay attention to how migrants' individual attributes interact with institutional mechanisms and social processes.

How would we treat Paddington Bear if he came to the UK today? Perhaps he would be a casualty of extortionate visa application fees; perhaps he would experience a cruel term of imprisonment in a detention centre; or perhaps his entire identity would be torn apart at the hands of a hostile environment that delights in the humiliation of its victims. Britain thinks of itself as a welcoming country, but the reality is very different. This is a system in which people

born in Britain are told in uncompromising terms that they are not British, in which those who have lived their entire lives on these shores are threatened with deportation, and in which falling in love with anyone other than a British national can result in families being ripped apart. Now fully updated to include the Nationality and Borders Bill, in this vital and alarming book, campaigner and immigration barrister Colin Yeo tackles the subject with dexterity and

rigour, offering a roadmap of where we should go from here as he exposes the injustice of an immigration system that is unforgiving, unfeeling and, ultimately, failing. [Handbook on Migration and the Family](#) Taylor & Francis
